

After the call

REPORT - TO BE POSTED RIGHT AFTER THE TEST (on the technician's channel)

I am an IT technician

My website is #179

What we agreed on (why):

-> I should reduce the size of the font, in order to reduce the feeling that there is too much information on all the pages.

-> The image in the ImmoBlade's page should be centered, above the text. Indeed, at the moment, the text is at the left and below the image, so it is not aesthetic.

What we disagreed on (why):

-> There is too much information in the homepage. I disagree because we wanted a precise description of the comparison.

-> The color red is too aggressive. I disagree because it is the same color as the Occitanie's logo, and the website's objective is to promote the Occitanie's image.

What still needs to be discussed online (why):

-> We need to discuss about the background of the homepage. Maybe a background color or a background image is a good idea. We still need to discuss which background I should put precisely.

FINAL AGREEMENT – TO BE POSTED AT THE END OF THE WRITTEN CONVERSATION

Here is what we agreed on. The technician must implement the changes on her/his website.
